

# Net Capacity™

“Assessing the Net Capacity of Schools”

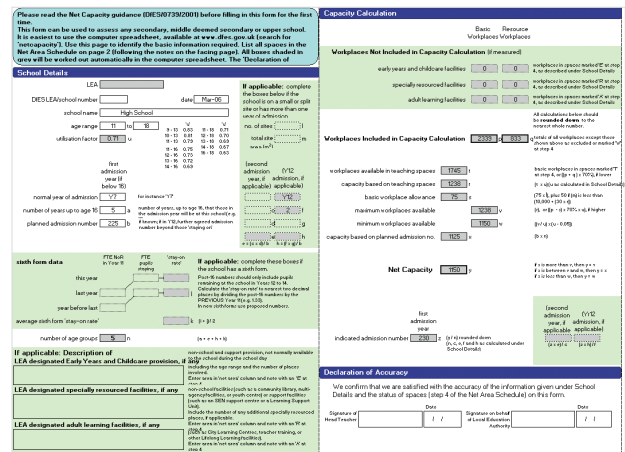

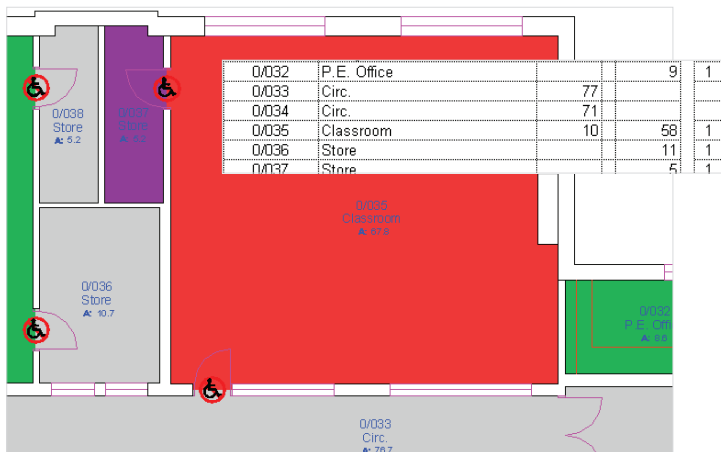

“It used to take six months to update our Net Capacity spread sheets for the DfES submission. With Cad-Capture’s solution I can do the whole lot myself in a single morning!”

**John McIntyre, Manchester City Council, Children’s Services.**

Cad-Capture provides a unique solution to automatically populate DfE Net Capacity Assessment forms directly from CAD floor plans. As anyone who has ever worked with these forms understands, the process of entering data manually is laborious and prone to error. Cad-Capture’s solution generates accurate Excel spread sheets in seconds, with no room for error, providing the CAD floor plans are up-to-date.

More and more Local Authorities are benefiting from Cad-Capture’s solution and find the speed, accuracy, convenience and cost savings to be unbeatable.

This solution is available as licensed software or as a service. Please contact Cad-Capture to request a demonstration at your offices.

## About Cad-Capture

Cad-Capture provides a complete range of solutions enabling organisations to capture and manage their engineering documents, drawings and data.

The fusion of specialist document conversion and data services with many years experience in systems implementation and application hosting makes it possible for Cad-Capture to provide truly effective solutions.

When considering document, content and data management projects, customers can be confident that Cad-Capture will provide the best available solution.

Cad-Capture can trace its roots back to 1987 and has evolved as one of the longest established and most experienced companies in its field.
