

HotSpots for Brava!

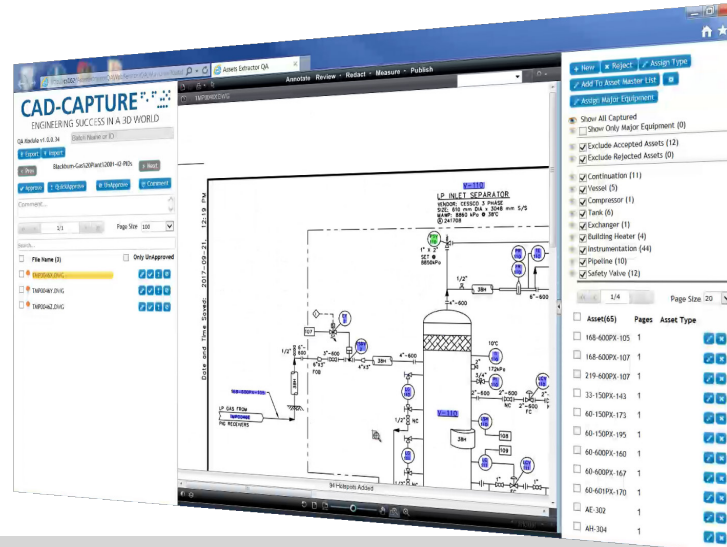

part of the Asset Information Management Suite

Extract, Collate, Correct & Activate Asset Tag information

Harvest Asset Tags automatically

Extract all Asset Tags from engineering documents and native CAD drawings. Overcome OCR errors and entry mistakes without a need to make changes to the original.

Supporting AutoCAD, MicroStation and PDF files, we can capture asset information from all visible and invisible layers to enrich your documents.

Content centric search, reference and retrieval.

Asset Tag information can be imported into OpenText Content Server and Extended ECM. This makes searching faster, with a shorter list of more relevant results.

No need to change original drawings!

Enrich your documents with intelligent HotSpots

Get full access to the location of Asset Tag details within engineering documents and drawings.

Cad-Capture's AssetXtractor allows Asset Tags to be identified and harvested from AutoCAD, MicroStation and PDF files.

Adopt the concept of Major Equipment

Identifying Major Equipment, in the AssetXtractor tool, makes it possible to rapidly search and retrieve key documents - straight from your ECM.

Major Equipment can be defined and configured based on your specification.

Manage Asset Tags electronically

The Asset Master List function, within AssetXtractor means you can create, add to or validate your own Asset Master List in conjunction with your ERP data.

Tags captured with AssetXtractor and processed in the AXQA tool, make finding and reporting errors and inconsistencies fast and effortless.

Enhanced end user experience with interactive HotSpots

This all leads to an interactive end user experience.

HotSpots link the users to where they need to get to in a fast, efficient manner - all at the click of a button! To the next part of a pipe via a continuation tag, a data sheet or a search of related documents via the Major Equipment feature...

The Asset Information Management Suite from Cad-Capture delivers HotSpots to your drawings and doc-

System Requirements

Supported ECM systems

OpenText Content Server
OpenText Extended ECM for SAP
OpenText Extended ECM for Engineering

Supported browsers

Internet Explorer

Additional products required
